

Smart Wooden Pendant Installation & Setup Guide

Installation: light driver is packed in white paper box wrapped with black metal ceiling cap, connect the brown wire to LED+, Blue wire to LED W and White Wire to LED C.

Once the L and N are connect to the AC lighting circuit, the light should be powered on and flash to indicate it is ready for pairing.

Connecting the light to remote controller.

The remote controller require 2 x AAA battery to operate, please insert the battery to powerup the remote.

Once the smart pendant is powered on, the remote controller will detect the pendant automatically.

The remote controller can be used to adjust the brightness as well as the colour temperature of the light.

Connecting the smart pendant to a smart phone APP:

- 1, Downloade the Tuya smart app from Apple or Android Store
- 2, Change the smart phone's Wi-Fi connection to 2.4Ghz
- 3, Open the App and register an account (require an account for linking with google home).
